**Hiring Committee**

SAP

Newtown Square, PA

Dear Hiring Committee,

I am writing to express my strong interest in the Developer position at SAP in Newtown Square, PA. The opportunity to contribute to a global leader in enterprise software—especially within a team focused on designing, coding, testing, and quality assurance—aligns perfectly with both my technical background and professional aspirations.

With a solid foundation in Java, SQL, and software systems development, I bring hands-on experience in full-stack web applications and application performance optimization. At JZ Enterprises LLC, I currently manage and enhance customer-facing web platforms where I work across frontend and backend layers using technologies like Java, JavaScript, HTML, CSS, and SQL. Additionally, I've gained experience with Apache Tomcat, REST APIs, and troubleshooting tools such as Postman and GitHub, along with practical familiarity with performance monitoring using tools like Splunk.

My academic and project work also equipped me with expertise in data structures, internet protocols, and Linux-based environments. I've used Scrum methodologies and CI/CD practices to streamline releases and maintain application reliability across varied systems. Furthermore, I am committed to continuous improvement and have developed a strong understanding of application defect solving, quality assurance, and scalable software design.

SAP's commitment to inclusion, innovation, and engineering excellence resonates deeply with me. I'm excited about the possibility of helping shape impactful SAP product features while collaborating in a hybrid work environment that values both autonomy and technical rigor.

Thank you for considering my application. I welcome the opportunity to contribute to SAP's mission and would be thrilled to further discuss how I can support your team.

Sincerely,

**Oleg Semenets**
